TERRAZO CARVING MATT

When the concrete has been layered with marble chips, the flooring style is referred to as "terrazzo." Simply put, the word means "terrace." Its beginnings can be traced to Italy, where artisans discovered that marble pieces embedded in concrete made for a flooring material that was incredibly tough and enduring. Terrazzo tiles are highly customizable. On the other hand, our Terrazzo collection offers two varieties: Matt and Carving. Particularly the Terrazzo series, which is one of our most robust products, withstands wear and tear and the test of time. It doesn't require a set maintenance schedule. Marble, glass, and shells are combined into terrazzo flooring, which is then sanded and polished to a smooth surface. Modern buildings are built with material, which is renowned for their durability, simplicity of maintenance, and versatility in terms of design. The collection is of top-notch quality and designed under state-of-the-art technology and infrastructure, it is versatile and ideal for both residential and commercial spaces. Our collection stands as a fantastic era of artistry.
